

Overview

# Plenary Session 2

October 20, 2008

Gender, climate change adaptation, disaster risk reduction, are closely linked.

The existing methods and tools of disaster risk reduction provide powerful capacities for adaptation to climate change.

Disaster risk reduction and adaptation to climate change share the same ultimate goal:

reduce vulnerability, increase resilience and achieve sustainable development

**“Climate change adaptation starts with disaster risk reduction.”**

# UNISDR Consultative Meeting with Parliamentarians, Manila

The background of the slide features a blue sky with light clouds. In the foreground, there are black silhouettes of two people. One person on the left is holding a laptop, and another person on the right is reaching out to shake hands with the laptop. The overall scene suggests a business deal or a collaborative agreement.

# DRR-CCA is Everybody's Business.

For more synergy, DRR and CCA communities need to focus on a shared agenda of poverty reduction, increasing funding flows to the poorest people and working together on challenges.
